### DETAILED ACTION

1. Applicant's amendment, initially filed 04/03/2007, has been entered.

Claims 1-24, 26-28, 30-32, 34-36 and 38-40 have been canceled.

Claims 25, 29, 33, and 37 are pending.

2. Applicant's election of the species of multiple sclerosis is acknowledged.

However, as acknowledged by applicant, all pending claims read on the elected species of treating a patient with multiple sclerosis with CTLA4.

Therefore, the election of species as set forth in the previous Office Action, mailed 10/04/2006, has been rendered moot.

Claims 25, 29, 33, and 37 are under examination in the instant application.

3. No Information Disclosure Statement has been filed in the instant application.

4. Affidavits and declarations, such as those under 37 C.F.R. 1.131 and 37 C.F.R. 1.132, filed during prosecution of the parent application do not automatically become a part of this application. Where it is desired to rely on an earlier filed affidavit, the applicant should make the remarks of record in the later application and include a copy of the original affidavit filed in the parent application.

5. If applicant desires priority under 35 U.S.C. § 120 based upon a previously filed copending application, specific reference to the earlier filed application must be made in the instant application. This should appear as the first sentence of the specification following the title, preferably as a separate paragraph. The status of nonprovisional parent application(s) (whether patented or abandoned) should also be included. If a parent application has become a patent, the expression "now Patent No. \_\_\_\_\_" should follow the filing date of the parent application. If a parent application has become abandoned, the expression "now abandoned" should follow the filing date of the parent application.

Also, see United States Patent and Trademark Office OG Notices: 1268 OG 89 (18 March 2003).

*Applicant should amend the first page of the specification to update the status of the priority documents.*

Art Unit: 1644

6. The application is required to be reviewed and all spelling, TRADEMARKS, and like errors corrected.

Trademarks should be capitalized or accompanied by the ® or ™ symbol wherever they appear and be accompanied by the generic terminology. Although the use of trademarks is permissible in patent applications, the proprietary nature of the trademarks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Appropriate corrections are required.

7. Applicant's amendment of the title is acknowledged.

It is noted that the current claims are drawn to the administration of "CTLA4" and not "CTLA-4Ig", as currently recited in the title.

8. The non-statutory double patenting rejection, whether of the obvious-type or non-obvious-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); In re Van Ornam, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and In re Goodman, 29 USPQ2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321 (b) and (c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78 (d).

Effective January 1, 1994, a registered attorney or agent of record may sign a Terminal Disclaimer. A Terminal Disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 25, 29, 33 and 37 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 5, 9, 13 and 17 of U.S. Patent No. 6,685,941.

Although the claims are not exactly the same, the patented claims which are drawn to LM609- /  $\alpha_v\beta_3$  – specific antibodies and antigen-binding fragments thereof anticipate the instant claims.

Art Unit: 1644

10. No claim is allowed.

As indicated previously in USSN 08/85,194, now U.S. Patent No. 6,685,941; the instant claims appear to be free of the prior art.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phillip Gambel whose telephone number is (571) 272-0844.
